The refurbishment boasts an impressive design – integrating high spec Laboratory Equipment such as Fume Cupboards, a vast range of high end Joinery, sharp Aluminium & Glazing Suites throughout and stunning Acoustic & Timber Feature Ceilings.

H.I Lighting selected the Aus-System for this project and in particular the System Kanal50 in pendant, which adds to the new modern and clean environment. The black pendants tie in nicely with the black accents seen in the glass window frames and doors, as well as in the student bench and tabletops. The SystemKanal50 was chosen for its lustrous illumination and customisable features. The result is a resplendent element to the remaining features of the project and truly sets the benchmark for schooling in the area.
